Advanced Customization

The K MACHINE is one of the few E.S.E. pod brewers on the market that offers both pod **pre-infusion** and **manual temperature control**.

4 Adjustable Temperature Levels

Level	Temperature	Recommended Use
4	208°F (± 9 °F) → 98 °C (±5 °C)	Maximum extraction, full-bodied
3	205°F (± 9 °F) → 96 °C (±5 °C)	Default – Optimal for most E.S.E. pods
2	201°F (± 9 °F) → 94 °C (±5 °C)	Balanced, sweeter notes
1	198°F (± 9 °F) → 92 °C (±5 °C)	Delicate coffees, reduced bitterness

Competitive Advantage: This feature is practically absent in most pod machines for home and office use. It allows you to perfectly customize every cup according to the pod type and your personal taste.

How to adjust temperature: Plug in the machine press and hold one of the buttons until the lights stop flashing.

To increase °F press  to decrease °F press  Automatically saved after 5 seconds.
